

Surveyor
Technical Services/MRM
Closing Date: August 11th, 2010

Posting #: 2010-120

Reporting to the Chief Engineer and working a two (2) weeks in / two (2) weeks out rotation at the Snap Lake Mine site, this position will provide survey services to the mine.

Responsibilities:

- Perform underground surveys to establish lines and grades to the Production Group;
- Survey underground advance pick-ups;
- Measure and establish surface geodetic baselines and permanent monuments;
- Provide topographic surveys of construction site areas;
- Provide earthwork cut and fill and quantity surveys;
- Provide calculations and records in support of all survey activities;
- Raw data download, processing and production of as-built drawings; and
- Downloading reports that summarize electronic results of surveying for mining, geology and engineering departments.

Requirements:

- Survey or Mining Diploma with three (3) to five (5) years of experience in an underground mine setting.
- Advanced computer skills, specifically in Microsoft Office and Autocad, are essential.
- Experience in Gemcom, Promine and/or any other mining software would be beneficial.
- Familiarity with modern Total Stations and GPS equipment an asset.
- Strong written and verbal communication skills are essential.
